

Kiosk

Rear Load

(Remove bills and load keys from rear of kiosk)

DEBITKEY Kiosks:

Placed in a convenient location to allow a customer to obtain a new key or add value to an existing key

Uses for Customers:

- Display value of key
- Dispense a new key
- Add value to existing key
- Credit card acceptor option also available
- Will charge price of key and dispense key with value adjusted - Example: The customer feeds a \$5 and a \$20 bill into the kiosk which is set to charge \$1.00 for a new key. The customer will receive a key with \$24.00 in value

Management Features:

- Full auditing capabilities with use of a service unit
- A running totals counter can be seen with a "show totals" key
- A second totals counter that can be cleared at any time with the use of "clear totals" key
- A low key indicator lets you know when you have 5 or less keys within dispenser
- If kiosk runs out of keys it sets itself to "Recharge Only" mode
- Change the cost of a new key with "price set" key
- Change the minimum amount a customer must insert before receiving a new key
